PROFESSIONAL SUMMARY

.NET developer with 14+ years in IT and 9+ years working with .NET, across the full cycle from requirements and design through delivery and support. Works mainly with ASP.NET Core, C#, and SQL Server, and has built multi-module ERP products for textile, manufacturing, and fragrance clients in India and the Gulf. Also experienced with Web API, Entity Framework Core, Dapper, microservices, and Agile delivery.

KEY ACHIEVEMENTS

- Built the Maintenance and Fixed Asset services as independent microservices, each with its own database and gRPC communication, alongside the BSOFT ERP platform.
- Delivered multi-module ERP products to clients in Oman and Dubai, handling requirements, UAT, and go-live directly with the clients.
- Delivered six or more core ERP modules per engagement (Sales, Production, Purchase, Finance, Inventory, Maintenance) across textile and manufacturing clients.
- Added the Transactional Outbox pattern, a MassTransit/RabbitMQ event bus, and Hangfire job scheduling to the BSOFT ERP system.
- Led code reviews and mentored junior developers in a six-member team, keeping to SOLID and Clean Architecture standards.

TECHNICAL SKILLS

Client-Side	HTML5, CSS3, JavaScript, jQuery, Ajax, Bootstrap
Server-Side	.NET Core 8.0, .NET 6.0, ASP.NET, Web API, MVC, gRPC, SignalR, Microservices
Language	C#
ORM / Data	Entity Framework Core, ADO.NET, Dapper, LINQ
Databases	SQL Server 2012–2022, Oracle 10g / 11i / R12
Architecture & Design	Clean Architecture, CQRS / MediatR, Repository Pattern, SOLID, Dependency Injection, 3-Tier, Modular Monolith
API & Messaging	Swagger / OpenAPI, FluentValidation, MassTransit / RabbitMQ, Hangfire
Testing & QA	xUnit, Moq, FluentAssertions, SonarQube
DevOps & CI/CD	GitHub Actions, CI/CD Pipelines, Git (GitHub, Gitea), TFS, SVN
Methodologies	Agile (Scrum), UAT, ERP Implementation

PROFESSIONAL EXPERIENCE

Senior Developer Bannari Spinning Pvt. Ltd. Coimbatore	Oct 2024 – Present
- Building BSOFT ERP, a modular monolith on ASP.NET Core 8 using Clean Architecture, CQRS/MediatR, EF Core, and Dapper. - Developed the Maintenance Management and Fixed Asset Management modules as ASP.NET Core Web API microservices, each with its own database, using gRPC for inter-service communication. - Set up per-module DbContexts on a shared SQL Server instance with schema prefixes, plus SignalR for real-time features. - Added the Transactional Outbox pattern with a MassTransit/RabbitMQ event bus and Hangfire for background jobs. - Led code reviews, enforced architectural standards, and mentored junior developers across the User Management, Inventory, Purchase, Sales, and Warehouse modules. - Managed the CI/CD pipeline on Gitea and coordinated QA environment migrations.	
Senior Technical Analyst Cadvil Technologies Kochi	Oct 2023 – Sep 2024
- Developed Cadvil ERP modules (Procurement, Inventory, Production, Sales, Finance, HR) for Dubai-based clients. - Handled direct communication with Emirates Pride Perfumes and Fragrance Network Factory for requirements, UAT, and go-live support. - Built the solution with ASP.NET MVC 4.5, C#, SQL Server 2019, the Repository pattern, and GitHub.	
Senior Software Engineer AES Technologies Coimbatore	Jun 2016 – Jul 2023
- Developed TexSavvy ERP, a textile ERP delivered to Oman Textile Mills (Oman), Premier Mills, and RB Woven's (Erode). - Built six modules for Oman Textile Mills (Sales, Production, Purchase, Maintenance, Finance, Inventory) on ASP.NET 4.0 and SQL Server 2012/2014. - Built five modules for RB Woven's (Sales, Weaving, Sizing, Merchandising, Inventory). - Developed Palladium Payroll, an accounting and payroll application with real-time item-level margin control. - Ran UAT sessions with international clients and provided post-implementation support.	

Career Break

2014 – 2016

- Planned career break for personal reasons; returned to full-time .NET development in 2016.

Software Engineer | C.R.I. Pumps Pvt. Ltd. | Coimbatore

Jul 2011 – Jun 2014

- Built the Gate Entry System using ASP.NET, C#, HTML, CSS, and Oracle DB.
- Worked on the Oracle Applications R12 (v11.7.1) implementation covering AR, AP, Order Management, Work-in-Process, and Cost Management.
- Handled data migration from legacy systems, requirement mapping, UAT, and go-live.

Software Developer | Micro Wits Technologies | Coimbatore

Jan 2010 – Jul 2011

- Led a small team through sprint planning and delivery of custom software projects.
- Built a barcode-based Stock Maintenance System using VB.NET, ADO.NET, SQL Server 2005, and Crystal Reports.

Junior Developer | Domex e-Data Pvt. Ltd. | Chennai

Aug 2008 – Dec 2009

- Built GUI screens and business-logic modules using VB.NET and Oracle 10g.
- Worked on business requirements, database design, and Crystal Reports reporting.

EDUCATION

MCA (Master of Computer Applications) — Raja College of Engineering, Madurai 73%	2004 – 2007
MBA (Master of Business Administration) — Alagappa University, Karaikudi 60%	2007 – 2009
B.Sc. (Computer Science) — Bharathidasan University, Trichy 68%	2001 – 2004

PROFESSIONAL CERTIFICATIONS

- ASP.NET Core Certification — JSquare, Malaysia.

KEY PROJECTS

Project #1: BSOFTEP (Modular Monolith)

Organization: Bannari Spinning Pvt. Ltd., Coimbatore

Environment: C#, ASP.NET Core 8.0, Web API, Clean Architecture, CQRS/MediatR, EF Core, Dapper, MassTransit/RabbitMQ, SQL Server 2022

Source Control: Gitea

Team Size: 6 Members

Methodology: Agile (Scrum)

Enterprise ERP built as a modular monolith on ASP.NET Core 8, covering ten business modules including User Management, Inventory, Purchase, Budget, Sales, Warehouse, Project, and Party Management.

- Set up the module structure with per-module DbContexts on a shared SQL Server instance and CQRS/MediatR request handling.
- Added the Transactional Outbox pattern with a MassTransit/RabbitMQ event bus and Hangfire for scheduled background jobs.
- Led code reviews and enforced SOLID and architectural standards across the User Management, Inventory, Purchase, Sales, and Warehouse modules.
- Managed the CI/CD pipeline on Gitea and coordinated QA environment migrations.

Project #2: Maintenance & Fixed Asset Management Services (Microservices)

Organization: Bannari Spinning Pvt. Ltd., Coimbatore

Environment: C#, ASP.NET Core Web API, gRPC, EF Core, SQL Server 2022 (separate database per service)

Source Control: Gitea

Methodology: Agile (Scrum)

Two independent services built alongside the BSOFTEP, each with its own database and communicating over gRPC.

- Fixed Asset service: asset registration, depreciation, and disposal handling.
- Maintenance service: preventive-maintenance scheduling and work-order tracking.
- Defined gRPC service contracts for inter-service communication and integration with the core ERP.
- Designed each service with its own database so they can be deployed and scaled independently.

Project #3: Cadvil ERP (Product)

Clients: Emirates Pride Perfumes, Dubai | Fragrance Network Factory, Dubai

Environment: ASP.NET MVC 4.5, C#.NET, jQuery, Bootstrap, 3-Tier Architecture, SQL Server 2019

Design Pattern: Repository Pattern

Source Control: GitHub

Team Size: 4 Members (Direct client communication)

Methodology: Agile (Scrum)

ERP product for two Dubai-based clients, delivered from design through UAT and go-live.

- Developed six modules — Procurement, Inventory, Production, Sales, Finance, and HR — using ASP.NET MVC 4.5 and the Repository pattern.
- Handled direct client communication with Emirates Pride Perfumes and Fragrance Network Factory for requirement gathering and UAT.
- Delivered on SQL Server 2019 with GitHub source control, following Agile/Scrum.

Project #4: TexSavvy ERP (Product) & Palladium Payroll

Organization: AES Technologies, Coimbatore

Clients: Oman Textile Mills Company LLC, Oman | Premier Mills Pvt. Ltd., Coimbatore | RB Woven's Pvt. Ltd., Erode

Environment: ASP.NET 4.0, C#.NET, jQuery, JavaScript, 3-Tier Architecture, SQL Server 2012/2014

Source Control: SVN

Team Size: 7 Members (Direct client communication)

Textile ERP delivered to mills in Oman and India, built on ASP.NET 4.0 over SQL Server 2012/2014.

- Built six modules at Oman Textile Mills: Sales, Production, Purchase, Maintenance, Finance, and Inventory.
- Built five modules at RB Woven's: Sales, Weaving, Sizing, Merchandising, and Inventory.
- Developed Palladium Payroll with payroll processing and real-time item-level margin control.
- Conducted UAT with international clients and provided post-implementation support.

Project #5: Gate Entry System

Client: C.R.I. Pumps Pvt. Ltd., Coimbatore

Environment: C#, ASP.NET, HTML, CSS, Oracle 10g

Web-based gate entry system to track inward and outward movement of materials and personnel.

- Built GUI screens, custom user controls, and business-logic components over Oracle 10g.
- Handled database design and management for gate transactions.

Project #6: Oracle Applications R12 Implementation (v11.7.1)

Client: C.R.I. Pumps Pvt. Ltd., Coimbatore

Environment: Oracle Applications R12 — GL, AR, AP, WIP, CM, OM, PO (Sun Solaris)

Team Size: 12 Members

Oracle Applications R12 implementation covering finance and supply-chain modules.

- Implemented AR, AP, Order Management, Work-in-Process, and Cost Management modules.
- Performed data migration from legacy systems and business-requirement mapping.
- Built customisations with Oracle Workflow Builder, and executed UAT, go-live, and post-implementation support.

Project #7: Stock Maintenance System

Environment: VB.NET, ADO.NET, SQL Server 2005, Crystal Reports

Team Size: 3 Members

Barcode-based stock system to track distribution and dispatch of items.

- Implemented barcode-driven tracking of item distribution and dispatch.
- Built Crystal Reports for daily, weekly, and monthly production summaries.
