PROFESSIONAL SUMMARY

Results-driven Senior .NET Developer with 14+ years of overall IT experience and 9+ years specialising in .NET, spanning the full software development lifecycle — from requirements analysis and architecture design to delivery and post-production support. Specialised in ASP.NET Core, C#, Clean Architecture, and enterprise ERP solutions, with a proven track record of delivering complex, multi-module ERP products for global clients across textile, manufacturing, and fragrance domains. Strong command of Microservices, Web API, Entity Framework Core, Dapper, SQL Server, and Agile methodologies.

KEY ACHIEVEMENTS

- Architected BSOFT ERP, a modular-monolith enterprise platform spanning ten business modules (User Management, Inventory, Purchase, Budget, Maintenance, Fixed Asset, Sales, Warehouse, Project, Party Management) on ASP.NET Core 8 with Clean Architecture and CQRS/MediatR.
- Delivered multi-module ERP products to international clients across three countries — Oman (Oman Textile Mills), UAE/Dubai (Emirates Pride Perfumes, Fragrance Network Factory) — and multiple domestic mills, owning delivery from requirements through UAT and go-live.
- Owned end-to-end delivery of six or more core ERP modules per engagement (Sales, Production, Purchase, Finance, Inventory, Maintenance), leading direct client communication for requirement gathering, UAT, and post-go-live support.
- Improved platform reliability by implementing the Transactional Outbox pattern, a MassTransit/RabbitMQ event bus, and Hangfire-backed job scheduling across the BSOFT ERP system.
- Led code reviews and mentored junior developers within a six-member team, enforcing architectural standards (Clean Architecture, SOLID, CQRS) across UserManagement, Inventory, Purchase, Sales, and Warehouse modules.

TECHNICAL SKILLS

Client-Side	HTML5, CSS3, JavaScript, jQuery, Ajax, Bootstrap
Server-Side	.NET Core 8.0, .NET 6.0, ASP.NET, Web API, MVC, gRPC, SignalR, Microservices
Language	C#
ORM / Data	Entity Framework Core, ADO.NET, Dapper, LINQ
Databases	SQL Server 2012–2022, Oracle 10g / 11i / R12
Architecture & Design	Clean Architecture, CQRS / MediatR, Repository Pattern, SOLID Principles, Dependency Injection, 3-Tier, Modular Monolith
API & Messaging	Swagger / OpenAPI, FluentValidation, MassTransit / RabbitMQ, Hangfire
Testing & QA	xUnit, Moq, FluentAssertions, SonarQube
DevOps & CI/CD	GitHub Actions, CI/CD Pipelines, Git (GitHub, Gitea), TFS, SVN
AI-Assisted Development	AI-assisted development & code generation (Claude Code, ChatGPT / LLM tooling), prompt engineering
Methodologies	Agile (Scrum), UAT, ERP Implementation

PROFESSIONAL EXPERIENCE

Senior Developer | Bannari Spinning Pvt. Ltd. | Coimbatore

Oct 2024 – Present

- Architecting and developing BSOFT ERP — a modular monolith built on ASP.NET Core 8, Clean Architecture, CQRS/MediatR, EF Core, and Dapper.
- Designing a multi-module system with per-module DbContexts, a shared SQL Server instance with schema prefixes, and SignalR real-time features.
- Implementing the Transactional Outbox pattern, MassTransit/RabbitMQ event bus, and Hangfire-backed job scheduling to ensure system reliability.
- Leading code reviews, enforcing architectural standards, and mentoring junior developers across UserManagement, Inventory, Purchase, Sales, and Warehouse modules.
- Managing CI/CD pipelines with Gitea and coordinating QA environment migrations.

Senior Technical Analyst | **Cadvil Technologies** | Kochi

Oct 2023 – Sep 2024

- Led development of Cadvil ERP product modules (Procurement, Inventory, Production, Sales, Finance, HR) for Dubai-based international clients.
- Managed direct client communication for Emirates Pride Perfumes and Fragrance Network Factory, handling requirements gathering, UAT, and go-live support.
- Delivered the solution using ASP.NET MVC 4.5, C#, SQL Server 2019, Repository Pattern, and GitHub source control.

Senior Software Engineer | **AES Technologies** | Coimbatore

Jun 2016 – Jul 2023

- Spearheaded development of TexSavvy ERP — a full-featured textile ERP delivered to Oman Textile Mills (Oman), Premier Mills, and RB Woven's (Erode).
- Owned six core ERP modules at Oman Textile Mills: Sales, Production, Purchase, Maintenance, Finance, and Inventory using ASP.NET 4.0 and SQL Server 2012/2014.
- Developed five modules at RB Woven's: Sales, Weaving, Sizing, Merchandising, and Inventory.
- Developed Palladium Payroll, an accounting and payroll platform with real-time item-level margin control and automated payroll processing.
- Conducted UAT sessions with direct international client communication and provided post-implementation support.

Software Engineer | **C.R.I. Pumps Pvt. Ltd.** | Coimbatore

Jul 2011 – Jun 2014

- Developed the Gate Entry System using ASP.NET, C#, HTML, CSS, and Oracle DB.
- Implemented Oracle Applications R12 (v11.7.1) covering AR, AP, Order Management, Work-in-Process, and Cost Management.
- Performed data migration from legacy systems, business requirement mapping, UAT, and go-live activities.

Software Developer | **Micro Wits Technologies** | Coimbatore

Jan 2010 – Jul 2011

- Led a development team in sprint planning and delivery of custom software projects.
- Developed a barcode-based Stock Maintenance System using VB.NET, ADO.NET, SQL Server 2005, and Crystal Reports.

Junior Developer | **Domex e-Data Pvt. Ltd.** | Chennai

Aug 2008 – Dec 2009

- Built GUI screens and business logic modules using VB.NET and Oracle 10g.
- Analysed business requirements and contributed to database design and Crystal Reports-based reporting.

EDUCATION

MCA (Master of Computer Applications) — Raja College of Engineering, Madurai	2004 – 2007 73%
MBA (Master of Business Administration) — Alagappa University, Karaikudi	2007 – 2009 60%
B.Sc. (Computer Science) — Bharathidasan University, Trichy	2001 – 2004 68%

PROFESSIONAL CERTIFICATIONS

- ASP.NET Core Certification — JSquare, Malaysia.

KEY PROJECTS

Project #1: BSOFT ERP

Organization: Bannari Spinning Pvt. Ltd., Coimbatore

Environment: C#, ASP.NET Core 8.0, Web API, Clean Architecture, CQRS/MediatR, EF Core, Dapper, MassTransit/RabbitMQ, SQL Server 2022

Source Control: Gitea

Team Size: 6 Members

Methodology: Agile (Scrum)

BSOFT ERP is a modular monolith enterprise resource planning system comprising ten business modules (User Management, Inventory, Purchase, Budget, Maintenance, Fixed Asset, Sales, Warehouse, Project, and Party Management).

Project #2: Cadvil ERP (Product)

Clients: Emirates Pride Perfumes, Dubai | Fragrance Network Factory, Dubai

Environment: ASP.NET MVC 4.5, C#.NET, jQuery, Bootstrap, 3-Tier Architecture, SQL Server 2019

Design Pattern: Repository Pattern

Source Control: GitHub

Team Size: 4 Members (Direct client communication)

Methodology: Agile (Scrum)

End-to-end ERP product development for international clients in the fragrance and F&B distribution sectors. Developed and delivered six core modules — Procurement, Inventory, Production, Sales, Finance, and HR — from initial design through UAT and go-live support.

Project #3: TexSavvy ERP (Product) & Palladium Payroll

Organization: AES Technologies, Coimbatore

Clients: Oman Textile Mills Company LLC, Oman | Premier Mills Pvt. Ltd., Coimbatore | RB Woven's Pvt. Ltd., Erode

Environment: ASP.NET 4.0, C#.NET, jQuery, JavaScript, 3-Tier Architecture, SQL Server 2012/2014

Source Control: SVN

Team Size: 7 Members (Direct client communication)

Full-featured textile ERP serving multiple international and domestic clients. Responsible for six modules at Oman Textile Mills (Sales, Production, Purchase, Maintenance, Finance, Inventory) and five modules at RB Woven's (Sales, Weaving, Sizing, Merchandising, Inventory), covering the complete SDLC from requirement analysis to UAT and post-implementation support.

Also developed Palladium Payroll at AES Technologies — a feature-rich accounting and payroll platform designed to increase business efficiency, optimise revenue, and protect profit margins through real-time item-level margin control and automated payroll processing.

Project #4: Gate Entry System

Client: C.R.I. Pumps Pvt. Ltd., Coimbatore

Environment: C#, ASP.NET, HTML, CSS, Oracle 10g

Designed and developed a web-based Gate Entry System to manage and track inward and outward movement of materials and personnel. Implemented database management using Oracle 10g with custom user controls and business logic components.

Project #5: Oracle Applications R12 Implementation (v11.7.1)

Client: C.R.I. Pumps Pvt. Ltd., Coimbatore

Environment: Oracle Applications R12 — GL, AR, AP, WIP, CM, OM, PO (Sun Solaris)

Team Size: 12

End-to-end Oracle ERP implementation covering Accounts Receivable, Accounts Payable, Order Management, Work-in-Process, and Cost Management. Responsibilities included module setup validation, data migration from legacy systems, business requirement mapping, Oracle Workflow Builder customisations, UAT execution, go-live activities, and post-implementation support.

Project #6: Stock Maintenance System

Environment: VB.NET, ADO.NET, SQL Server 2005, Crystal Reports

Team Size: 3

Developed a barcode-based stock management system to track distribution and dispatch of items. Implemented Crystal Reports for daily/weekly/monthly production summaries and performance tracking.
